PROFILE

Baskent Universities computer engineering department student, who strong in human relations, programmed and planned in his studies and sees software development as an entertainment rather than seeing it as a job. With more than 3 years of experience in Java and Android application development, he is skilled in this field and prone to teamwork. Developing their own projects at every opportunity. He has 6 months of research and development experience in machine learning and artificial intelligence. I have been working on web-based application development, designing websites and at the Front-End for a year. He is currently engaged in research and development activities on the autonomous drone movement in the field of artificial intelligence.

EXPERIENCE

Intern Engineer, Turkish Aerospace Industries, Ankara - 2019 - Current

Designing and developing GUI for MMU project.

Intern, HAVELSAN A.S, Ankara - 2019

Preparing XML for working in TeamCity program, XML Builder preparation to make it easier to prepare XML from available data, Designing and developing a GUI for the prepared XML Builder, Studies on Docker and AWX.

Intern Engineer, Turkish Aerospace Industries, Ankara - 2018 - 2019

Preparation of license management system and preparation of a website suitable for this system, Studies on time synchronization between servers.

Intern, ATAR Labs Bilisim A.S, Ankara - 2018

Testing the previously prepared Scripts on the system, Preparing new scripts to work on ATAR, Preparation of job tracking system between jobs & users.

EDUCATION

Baskent University, Ankara - 2015 - Current

GPA: 3.49 / 4.00

Alparslan Anatolian High School, Ankara - 2011 - 2015

SKILLS

C, C++, C#, Java, Kotlin, Python, Perl, SQL, JavaScript, HTML5, CSS3

FOREIGN LANGUAGES

English (Upper-Intermediate), Turkish (Native Language) PROJECTS

PROJECTS

Android

- **MarketApp:** Showing the products in the system to the user, listing similar products and adding selected products to the basket
- **UlasBana:** Visual design, interface development, earning points and saving the score in the database
- **Cliya:** Development of the system that enables doctors to enter the diseases database, informing the user if there is an epidemic in the region where it is located
- **Where Is My Gift:** A mobile game like Flappy Bird
- A social media app study like Onedio tests
- Firebase application that encrypts end-to-end using AES for internal communications
- Information application about music groups

Java

- Animal information and tracking system for pet-shops
- Game bot systems prepared with Selenium

Kotlin

- Designing and developing a GUI to make it easier to prepare XML

C#

- **Stack of Shape:** Mobile game prepared with Unity 3D
- **Tap Picture:** Mobile game prepared with Unity 3D
- Simulation environment for drone artificial intelligence with Unity 3D

DEGREE, SCHOLARSHIP AND CERTIFICATES

- OSYM 50% Education Scholarship
- METU - Hackaton 2019, Participant
- Iste Baskent 2018, Participant
- E-GameShow - Redbull-GboxVR 2017, Organization Team
- Iste Baskent 2017, Organization Team
